PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with hands-on experience in cloud computing, containerization, and monitoring tools. Skilled in AWS services, Kubernetes, and CI/CD pipelines with a strong foundation in troubleshooting distributed systems. Passionate about building scalable, reliable infrastructure and improving deployment workflows through automation.

TECHNICAL SKILLS

Cloud Platforms

- **AWS:** ECS, Fargate, DynamoDB, SNS, EC2
- **GCP:** GKE, Cloud Run, Cloud SQL (Basic)

DevOps & Containerization

- Docker, Kubernetes (Deployments, Services, Ingress)
- CI/CD: Jenkins, GitHub Actions

Monitoring & Logging

- Prometheus, Grafana

Infrastructure & Automation

- Terraform / CloudFormation (Basic)
- Shell Scripting, Python

Networking & Security

- Load Balancers (ALB, NLB), API Gateway, NGINX, Reverse Proxy
- DNS, HTTP/HTTPS, gRPC
- IAM Roles, Security Groups

Programming

- Python, Java, SQL

Tools

- Git
-

PROFESSIONAL EXPERIENCE

Cloud Computing Intern

EthosMantra | 2026 – Present

- Assisted in managing and monitoring cloud infrastructure using AWS services
 - Supported deployment of containerized applications using Docker
 - Worked with Kubernetes for basic deployments, services, and scaling
 - Monitored system performance using CloudWatch and assisted in resolving alerts
 - Helped troubleshoot issues across infrastructure, networking, and applications
 - Contributed to automation tasks to improve operational efficiency
 - Collaborated with development teams for deployment and debugging workflows
-

PROJECTS

CyberThreat Eye (Cloud Security + Machine Learning)

- Developed a machine learning-based threat detection system
- Analyzed security logs to identify anomalies and threats
- Created visualizations to monitor and interpret threat patterns

House Price Prediction

- Built predictive models using Linear Regression and Random Forest
 - Performed data preprocessing and feature engineering
 - Improved model performance through tuning and evaluation
-

EDUCATION

Bachelor of Engineering in Artificial Intelligence

Matoshri College of Engineering, Nashik

HSC – SNJB High School

84.06%

CERTIFICATIONS

- Junior Data Engineer – Kukbit Pvt. Ltd. (June 2024)
-

KEY SKILLS & COMPETENCIES

- Cloud Infrastructure Management
- Kubernetes & Container Orchestration
- CI/CD Pipeline Support
- Monitoring & Alerting Systems
- Incident Response & Root Cause Analysis
- Troubleshooting Distributed Systems
- Cross-team Collaboration
